

Eco Whisper Turbine | 20kW

Technical specifications

Key features

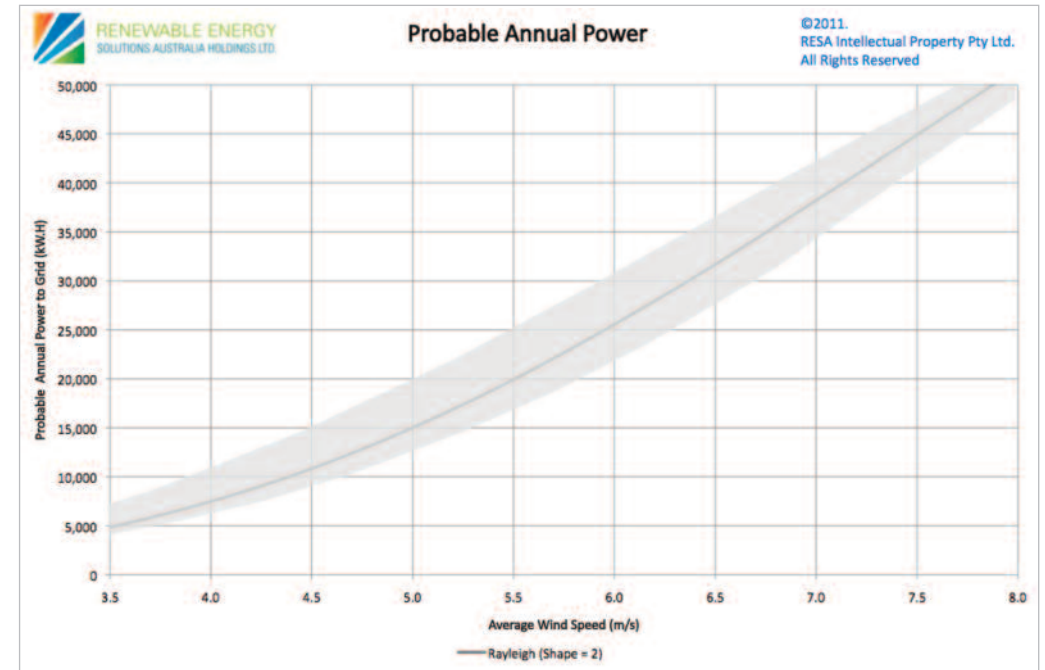

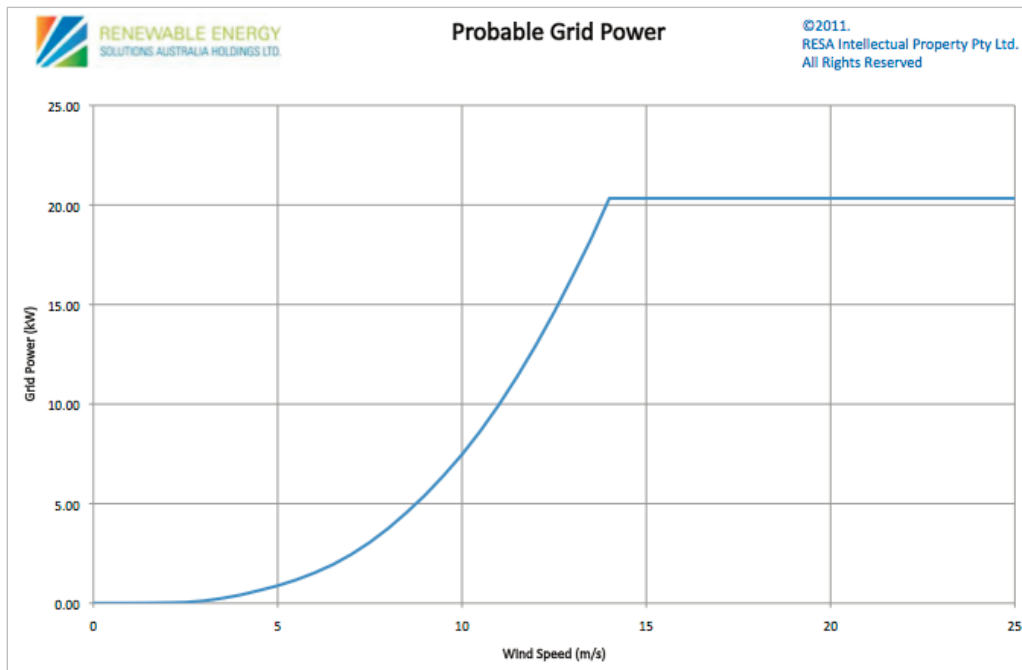

- Silent, sustainable, superior wind technology
- 6.5m blade diameter ~ 21.1m height
- 20kW rated silent wind turbine
- 30 blades extending outwards from a centre hub
- Dynamic slew drive eliminates requirement for tail
- Solid structure maximises visibility of turbine to birdlife
- Switched reluctance generator and reactive inverter
- Hinged pole design
- Three patents pending

Design advantages

- Highly efficient in low winds and produces virtually no noise
- Cost-effective transportation in standard size container
- Easy to erect with minimal skilled labour or resources
- Can be lowered for maintenance or during extreme weather events

Benefits

- Aesthetic appeal
- Small environmental footprint
- Near silent operation
