

Schools leading the way! Monbulk Primary School (Victoria, Australia)

Monbulk Primary School in Victoria has embedded environmental sustainability across the whole school. The school's goal was to reduce its environmental impact while educating students about sustainability and involving families and the wider community in climate action.

The school adopted a whole-school sustainability approach, including:

- Appointing some staff as sustainability leaders
- Developing a strategy to engage students
- Supporting senior school students to become part of a Sustainability Team
- Reviewing the curriculum to understand and improve how schools teach sustainability
- Installing solar power systems and decreasing electricity and gas usage
- Reducing waste to landfill after implementing 'rubbish free lunches'
- Joining the Schools Water Efficiency Program
- Partnering with Bunnings Warehouse and Home Hardware to plant trees on National Tree Planting Day.
